

Feature: Monthly amount component

Where the user can see how much he should save by month to achieve his goal

Background:

Given the user is on the saving goal page

@automated

Scenario Outline: Check monthly value according with month

Given the "total amount" field value is "<total amount equal to>"

When the month on "reach goal by" component is the "<month>"

Then the "monthly amount" field value is "<monthly amount equal to>"

Examples:

total amount equal to	month	monthly amount equal to
1,000.00	current month	1,000.00
1,000.00	next month	500.00
1,000.00	next month +2	250.00

@manual

Scenario Outline: Checking monthly amount value after stressing total amount field

When the user inputs a valid money amount with "<char qty>" characters in the total amount field

Then the input should be accepted and appear in the field

And the monthly amount should not be zero

Examples:

char qty
10
20
30
