```gherkin
Feature: Confirm Button
    Where the user can see and try to interact with the button that would confirm
 his saving goal

    Background:
        Given the user is on the saving goal page

    @automated
    Scenario: Check if Confirm button is visible on the screen
        Then the confirm button should be visible on the screen

    @automated
    Scenario: No action by clicking on Confirm button
        When the user clicks on the confirm button
        Then nothing should happen
```
